

EXPERIMENT NO. 8

Student Counselling System using Zoho Creator (SaaS)

Aim

To develop a cloud-based Student Counselling System using Zoho Creator for managing student counselling details.

Objective

Create a SaaS application, store student details, display eligibility alerts, and generate reports.

Software Requirements

Zoho Creator, Deluge Script, Google Chrome, Internet Connection.

Theory

The Student Counselling System is a cloud-based application that stores student details such as name, age, address, phone number, subjects studied, year of passing, percentage of marks, and domain interest. Zoho Creator provides SaaS functionality for data storage and reporting.

Fields Used

Student Name, Age, Address, Phone Number, Subjects Studied, Year of Passing, Percentage of Marks, Domain Interest, Counselling Status, Counsellor Name.

Algorithm

Start → Enter Student Details → Validate Eligibility → Display Alert → Save Record → Generate Report → View Record → Stop.

Procedure

1. Create the application.
2. Design the form.
3. Add required fields.
4. Add Deluge workflow.
5. Enter sample records.
6. Generate report.
7. Verify records.

Observation

Student records were successfully stored. Eligibility alerts were displayed correctly. Reports and individual record views worked as expected.

Result

The Student Counselling System was successfully developed using Zoho Creator.

Conclusion

The experiment demonstrated a SaaS-based counselling application using Zoho Creator.
